**Subject:** Re: Parkersburg Ames Warehouse - air analytical not loaded yet

But I still think they would post their first round of analytical that was collected on 10/23 and sent to lab even if they narrow list of analyses at some point? Are you saying they wouldn't do that based on results? Even NDs would be useful info and I bet they had some detects anyway.

Hello Lora,

The consultant was going to narrow the list based on results. PM were the only ones with detections when I reviewed the data yesterday so that's probably why.

Just FYI- I don't see any other detects in field monitoring today, just PM (see screenshot).

I see a spot on website for analytical (39 minicans; SO2; PAHs / 35 field samples 4 blanks collected on 10/23) but results aren't loaded yet unless I am missing that somewhere.
